C2W-LTS: 2010

General

Testing of any product, raw material or other part is a necessary requirement in providing quality assurance to clients and ensuring the safety of the end user. It's always an issue of enormous importance, particularly given the huge damage that has recently been inflicted on the reputation of companies who have previously been sourcing from China. C2W can arrange for appropriate tests to be performed on a wide range of materials, products, product lines, prototype creations and services.

C2W can advise clients and their suppliers on all government and industry regulations. Using internationally approved methods, standards, equipment and guidelines, C2W arranges for the testing of consumer products, commercial products, commodities, and raw materials for compliance and suitability against regulatory requirements so that every client can be sure the product being manufactured is safe and fit for purpose and sale.

We only use worldwide accredited and authorized laboratories for testing and all originals of certificates and reports can and will be sent to clients upon request.

General Services and Capabilities

- Material Testing
- Chemical Testing
- Metallurgical Testing
- Non-Metals Testing, including Plastic and Rubber
- Surface Finish Testing
- Hardness Testing
- Textiles Testing
- Failure Analysis Services

- Simulated Environmental Testing
- Electrical Product Safety Testing
- Global Product Certifications - UL, CSA, ANSL, CE, ETL, GS, ASTA, BEAB, ROHS etc.

C2W Testing Partners

C2W has close relations with two local independent laboratory testing facilities.

Zhuhai Inspection and Quarantine Technical Centre

The Inspection Technical Centre of Zhuhai Entry-Exit Inspection & Quarantine Bureau (ZHTC) that was approved by General administration of quality supervision, inspection and quarantine (AQSIQ), was established in October 1999. This Chinese Government owned local laboratory facility specializes in material chemical composition and surface finishing test procedures.

See www.zhtech.cn for additional information regarding ZHTC and their capabilities.

Intertek China Lab Testing Facility

Intertek is world leader in laboratory testing and has a world class lab facility in the neighboring city of Shenzhen. C2W has established strong relationship with Intertek China and acts as our customer's eyes and ears in support of their capabilities - primarily in ensuring that product from customer orders are the products actually being sent for testing.

Our strong partnership with Intertek is one of C2W's biggest strengths; Intertek has a world-wide network of 930 laboratories and 18,000 staff in over 100 countries.

Intertek Labs are capable of a wide range of testing to international US and European standards as per customer requirements.

See www.intertek-etlsemko.com for additional information regarding Intertek and their capabilities.

Associated Costs

C2W will specify our own minimum test parameters on initial project assessment. Customer specific testing requirements above and beyond this can be undertaken at a discounted rate.

FREE Consultation and Custom Quotation:

C2W will process a free quotation for any lab testing requirement (quotes include UPS charges for delivery of original certificates). Full example test reports/certificates are available on request for most major testing processes.
